

Commenting on the FCC proposal. I am not in favor of any proposal that would lessen the state of Indiana's Telephone Privacy Law protections. The Indiana law has improved time in our home by significantly lessening unwanted, unwelcome solicitation calls during meal times, evenings and weekends. The Indiana law has been extremely effective in virtually eliminating these annoying calls from our home. I used to receive 2-3 per night & this number has decreased to almost 0 since implementation of the Indiana law. I would not be in favor of any FCC proposal that would diminish the effectiveness of the Indiana law. Thank you.
